

Company Profile and Overview

PATHMAKER GROUP

"Clearing your **path** through the
identity and security management **jungle**™"

PathMaker Group is a specialized Identity and Security Management consultancy, blending core technical and product expertise, consultative know-how and extensive implementation experience. Driven by your unique business, compliance requirements and specific environment, we help you assess, plan, select, and integrate the right mix of products and solutions to optimize and secure your business IT, reduce your project risk, and maximize performance.

We provide complete solutions by blending software, hardware, managed service solutions, professional services, and customized training. We work to leverage your investments by integrating new solutions with your current products.

Since 1990, our teams have proven over and over that IT projects can be executed successfully. The value of each of these experiences continues to provide synergistic growth and maturity. Your organization can reap these benefits today.

Our high-quality, formalized methodologies, grounded in PMI project management principles, have been refined through practical application, and have gleaned best-practices from dozens of multi-million dollar projects.

Headquartered in Dallas/Fort Worth area, the employees of PathMaker Group have been delivering successful IT and Security projects for Fortune 500 corporations for more than 15 years.
